DESCRIPTION	<p>The Mary R. Fisher School in Thompson, CT has a Gifted and Talented Program that serves grades 1-4. The program offers enrichment classes bi-weekly to each classroom. Additionally, specific students are identified based on various characteristics and are offered a pull-out program to suit their needs. The pull-out program offers independent project studies on topics of the student's choice. Much like the bi-weekly enrichment classes, the pullout program also offers hands-on learning using an integrated approach. Once students are identified for the pullout program, classroom curriculum is adjusted to also suit their needs. A new component involves our special subject teachers in music and art, who now have schedules that allow them to provide direct enrichment and/or consultation to the students who show potential in any of those areas.</p>
